

# APPLE PAY GUIDE

Apple Pay works with Apple devices. You can make secure purchases in stores, apps, and on the web. You can send and receive money from friends right in Messages. When you make a purchase, Apple Pay uses a device specific number and unique transaction code. Your card number is never stored on your device, apple servers, or shared with any merchant.

## Step 1

Click on the **Wallet** app.

Then click the “+” sign to add a new card.

## Step 2

Click **Continue**.

## Step 3

Click on **Credit** or **Debit Card**.

## Step 4

It will prompt you to take a picture of your card.

## Step 5

Verify your information is accurate and click **Next**.

The screenshot shows a mobile app interface for verifying card information. At the top, there are navigation buttons for 'Back' and 'Next'. The main heading is 'Card Details' with the instruction 'Verify your card information.' Below this, there are two columns of input fields. The left column contains 'Name' (with the value 'JESSIE') and 'Card Number'. The right column contains 'Card Details' (with the instruction 'Verify and complete your card information.'), 'Expiration Date', and 'Security Code'.

## Step 6

Agree to the **Terms and Conditions**. “Agree” is found in the lower right hand corner of the screen.

## Step 7

Now your card has been added to Wallet. You can choose this card to be your Default Card if you would like.
